

THE LATEST IN SAFETY AND DESIGN

*Skydeck™ And Carl Stahl® Have Teamed Up To Provide
The Newest Technology For Overhead Safety And Optics.*

Combines the walkable SkyDeck™
surface with integrated X-LED
technology

Individually programmable X-LED
pucks enable limitless creative
configurations

Ensures safe and efficient
overhead access for maintenance
and design flexibility

WHY SKYDOTS?

- Transform ceilings into dynamic, event-specific lighting displays that produce dazzling animations bringing your venue to life
- Create new revenue streams by using X-LEDs for customizable digital signage and advertising
- Enhance dark rides with breathtaking effects and elevate stage productions with cutting-edge visual technology.

* Image for illustration only. SkyDots™ are installed below the walkable grid surface.

By adding Carl Stahl®'s unique X-LED puck to the cross points of SkyDeck™ wires, your grid becomes its own light show. From displaying images as if it were a TV to custom lighting effects, each puck is capable of being individually controlled, resulting in an immersive and captivating experience for your audience.
